

IGU

Commission on Gender and Geography
Commission Genre et Géographique

Letter of Support

On behalf of the IGU Commission on Geography and Gender, we are pleased to express our support for the Conference on Artificial Intelligence and Geography, which will be held at Sorbonne University in Paris, France, from July 5 to 8, 2027. Artificial Intelligence is a reality of contemporary society, and Geography must deepen the debates on the spatial perspective of these new technologies.

We hope to contribute with a gender perspective on the themes of Artificial Intelligence, given that this is an area dominated by men. The IGU Gender Commission enthusiastically endorses the initiative of the regional conference in Paris and the theme chosen for this endeavor.

Sincerely,

Prof. Dr. Joseli Maria Silva
Chair of Commission on Gender and Geography
the International Geographical Union

Curitiba, Brazil, October 30, 2025.
